Acknowledgements

The National Steering Committee would like to extend its appreciation to all organisations and individuals who participated in the drafting of this budget input, especially the participants in our consultative conferences and the researchers who prepared various papers.

The following persons or organisations made their research findings and publications available:

- Treatment Action Campaign
- Surplus Peoples Project
- Economic Policy Research Institute (EPRI)
- Urban Sector Network
- Research Triangle Institute
- Community Agency for Social Enquiry
- National Labour and Economic Development Institute
- Programme for Land and Agricultural Studies at the University of the Western Cape

In addition, many organisations and individuals provided comments and constructive criticisms. A special word of thanks goes to these individuals for creating the intellectual climate in which to develop our ideas.

Much of the research undertaken requires that government officials provide access to information. The openness of many government departments to share information and engage on ideas was commendable. We trust that this relationship will continue in the future.

We are grateful to NALEDI for providing research coordination, logistical support and for assisting in the publication of this document. Ebrahim-Khalil Hassen has provided able leadership to the research process during the year.

We also welcome the Foundation for Human Rights as our funder for the following year, and look forward to building a strong working relationship.

A final word of thanks goes to the reader. We look forward to hearing your comments on this document.

National Steering Committee

People's Budget

February 2003

Contents

List of tables	vii
List of graphs	vii
List of boxes	vii
